For Immediate Release

As healthcare professionals meet in New Orleans, Foreseeson will be there with today's digital display devices.

Anaheim, California - Foreseeson Custom Displays looks forward to exhibiting its products and services at the Association of periOperative Registered Nurses congress in March of 2012.

Celebrating its 59th anniversary, the AORN Congress provides access and networking opportunities with a highly desirable group of decision-makers. AORN attendees are end-users of products and services in the perioperative field. Foreseeson plans to showcase its offerings, share the latest technological developments in the industry, and reach high-quality leads.

The AORN Congress is the largest education and networking conference of perioperative nurse professionals in the world and the largest surgical products trade show in the US. Over 5,000 professional attendees representing more than 2,000 hospitals and healthcare facilities will be gathered for the exhibition.

Foreseeson is a provider of innovative, reliable custom display monitors and components. By collaborating with our strategic global partners, Foreseeson has the capability to engineer, manufacture, and support displays and interface components for numerous sectors of the economy. Our products are designed to work together as a complete system solution for virtually any electronic display monitor need. Foreseeson Custom Displays is headquartered in Anaheim, California. Our sales offices are located in the US, Korea, the United Kingdom, and Germany.
