For Immediate Release

Foreseeson expands manufacturing capability in California

Anaheim, California - In response to growing demand by medical device customers, Foreseeson Custom Displays, Inc., Anaheim, CA, is extending its manufacturing capabilities to the United States from Korea. The expansion of our "controlled manufacturing environment" is scheduled for completion in Q1 2010, at the present ISO 9001 manufacturing site in California. When finished, we will be equipped to provide full assembly, secondary operations and packaging capabilities.

Foreseeson is a provider of innovative, reliable custom display monitors and components. By collaborating with our strategic global partners, Foreseeson has the capability to engineer, manufacture, and support displays and interface components for numerous sectors of the economy. Our products are designed to work together as a complete system solution to virtually any electronic display monitor need. Foreseeson Custom Displays is headquartered in Anaheim, California. Our sales offices are located in the US, Korea, the United Kingdom, and Germany.
