

Expandable Video Over IP Network

Vy-Net2

Connectivity That Grows With You

Vy-Net2 is a video over IP network solution that connects video sources to end-point destinations, using minimal hardware. The system uses Ethernet infrastructure.

Vy-Net2 deploys quickly, integrates smoothly, and is ready to expand when future needs change.

An installation can be in a switching system (one encoder to one, many or all end points via multicast) or as a simple point to point streaming device/extender via Cat6a/Cat7 cabling.

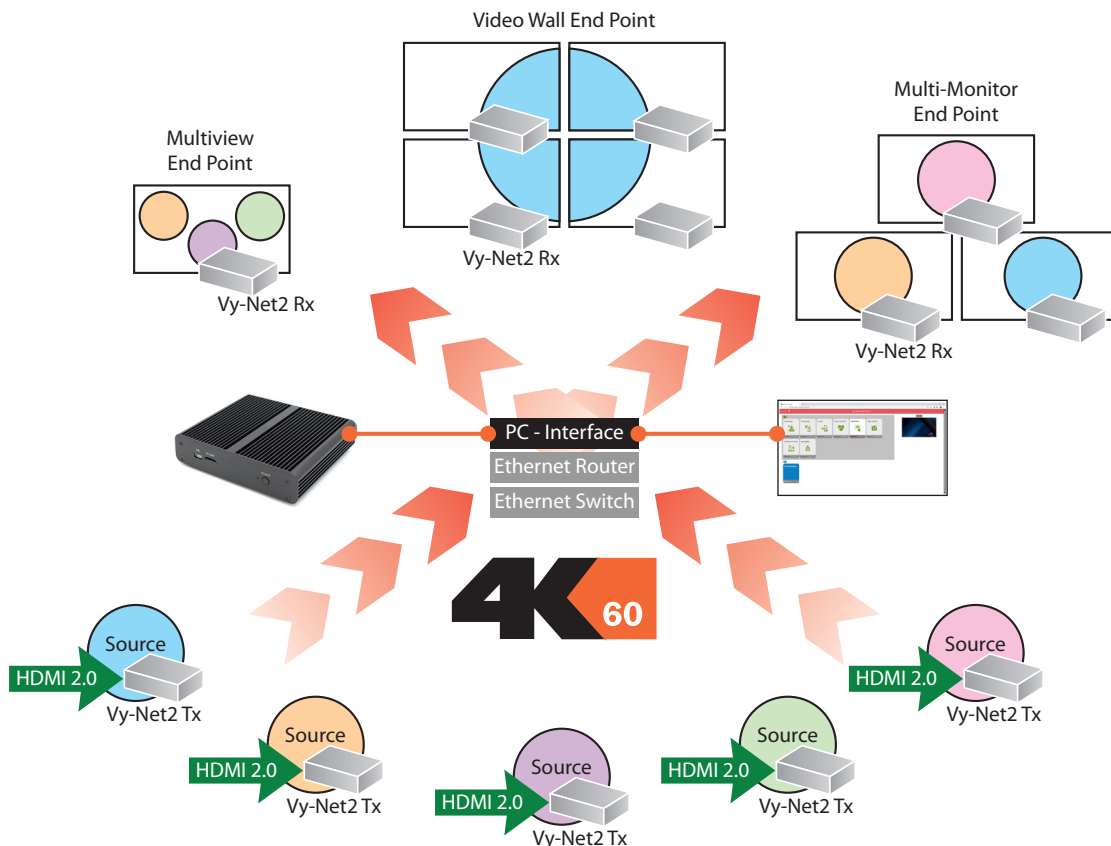

Simple Interface, Powerful Features

The Vy-Net2 web-based interface helps with initial setup, and controls the daily use of Vy-Net2 devices. The interface routes sources to monitors, up to 4K@60 fps video. The interface also allows naming of sources and monitors, previews active video signals (via Vy-Net1 encoder), has a library of icons for customization, and offers resizing/repositioning of picture-

in-picture or multiview layouts. Audio and KVM functions are also available. The interface operates on any device running Chrome browser with access to the Vy-Net2 network.

Vy-Net2 units are powered by the included power supply. Other requirements include a Wi-Fi router, recommended Cat6a/Cat7 cable, and a 10Gb network switch.

Expandable Video Over IP Network

Vy-Net2

Specifications

General Features

Item	TX	RX	Description
Input Signal			• HDMI 2.0
			• 10GbE (copper)
Output Signal			• 10GbE (copper)
			• HDMI 2.0
Maximum Resolution	3840 x 2160 @ 60Hz		
Keyboard Connector	USB A-Type x 1		
Mouse Connector	USB A-Type x 1		
Audio Connector	Phone Jack, 3.5 mm		

Item	TX	RX	Description
Unit Dimension			195(W) x 35(H) x 110(D) mm
			7.68(W) x 1.38(H) x 4.33(D) inch
Power Supply	DC + 12V		
Operating Temperature	0° - 40° C		
Relative Humidity	1 - 80%, non-condensing		
Recommended Cable	Cat6a/Cat7		
Weight			• 600g, 1.32 lbs.
			• 605g, 1.33 lbs.

Routing Made Easy

Step 1

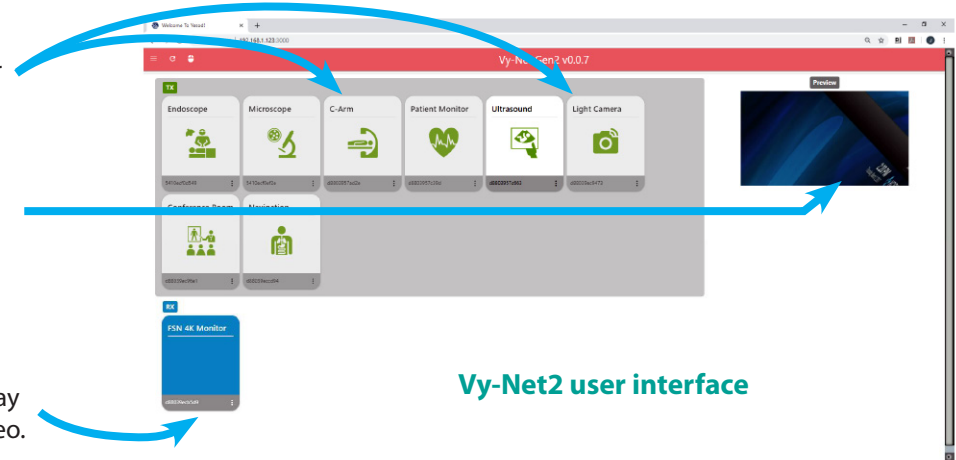

Select a source, or two sources (PiP), or 3+ sources (multi-view).

Step 2

See a preview of the selected video signal by using a Vy-Net1 encoder, or a layout representation for multiple selected sources.

Step 3

Click on a destination, typically a display monitor, and let Vy-Net2 route the video.

Vy-Net2 user interface
